Directory  
Québec City  
**Services for  
Immigrants**  
July 2010

This is a directory of services for those who have immigrated to Québec City.

It lists resources that can help you meet your many needs, from the moment you arrive until you are fully at home in your new community, including your social and economic integration.

As services are frequently modified, this directory may be revised or improved. Regular updates are planned

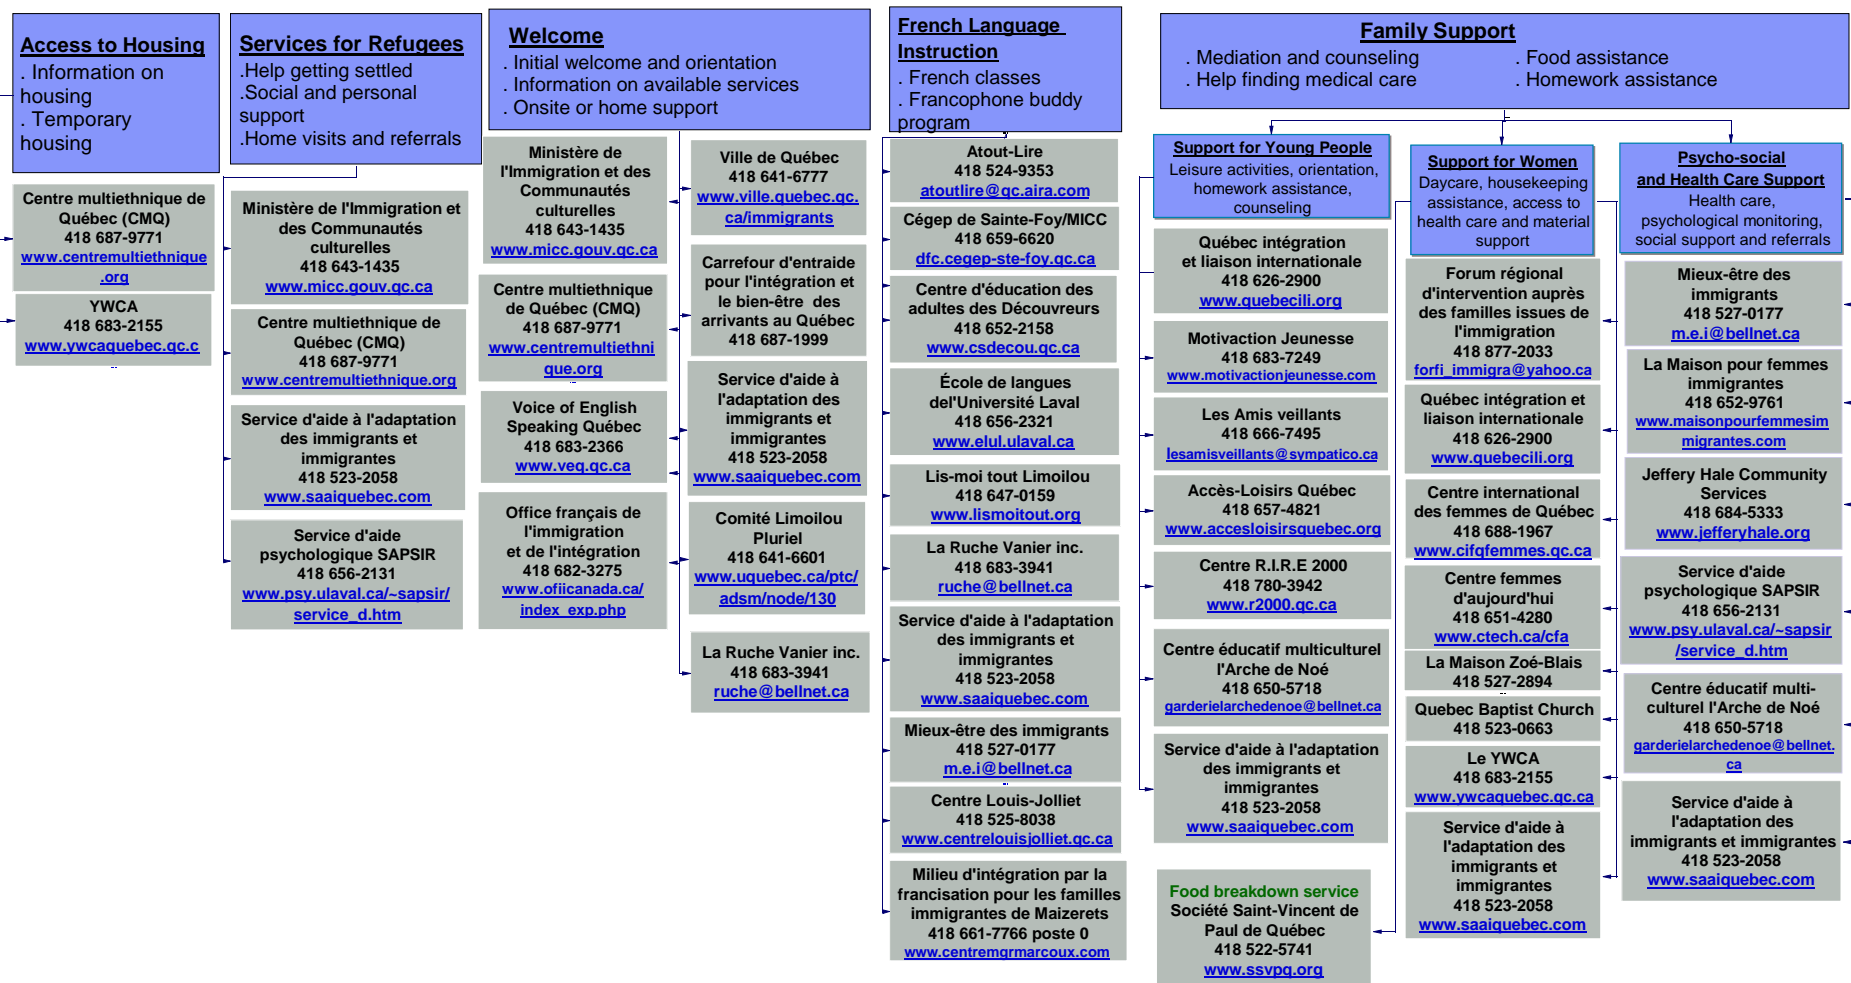

The directory lists government, paragonmental, and municipal organizations, associations, and institutions that are dedicated to serving immigrants' needs. It also contains references—not necessarily for new arrivals—that may help you as you settle into your new surroundings.

A number of programs and services are also available for you and the members of your family. To begin with, there are support services that can help you adapt to the French language and find a place to live, schools, child care, and your first job.

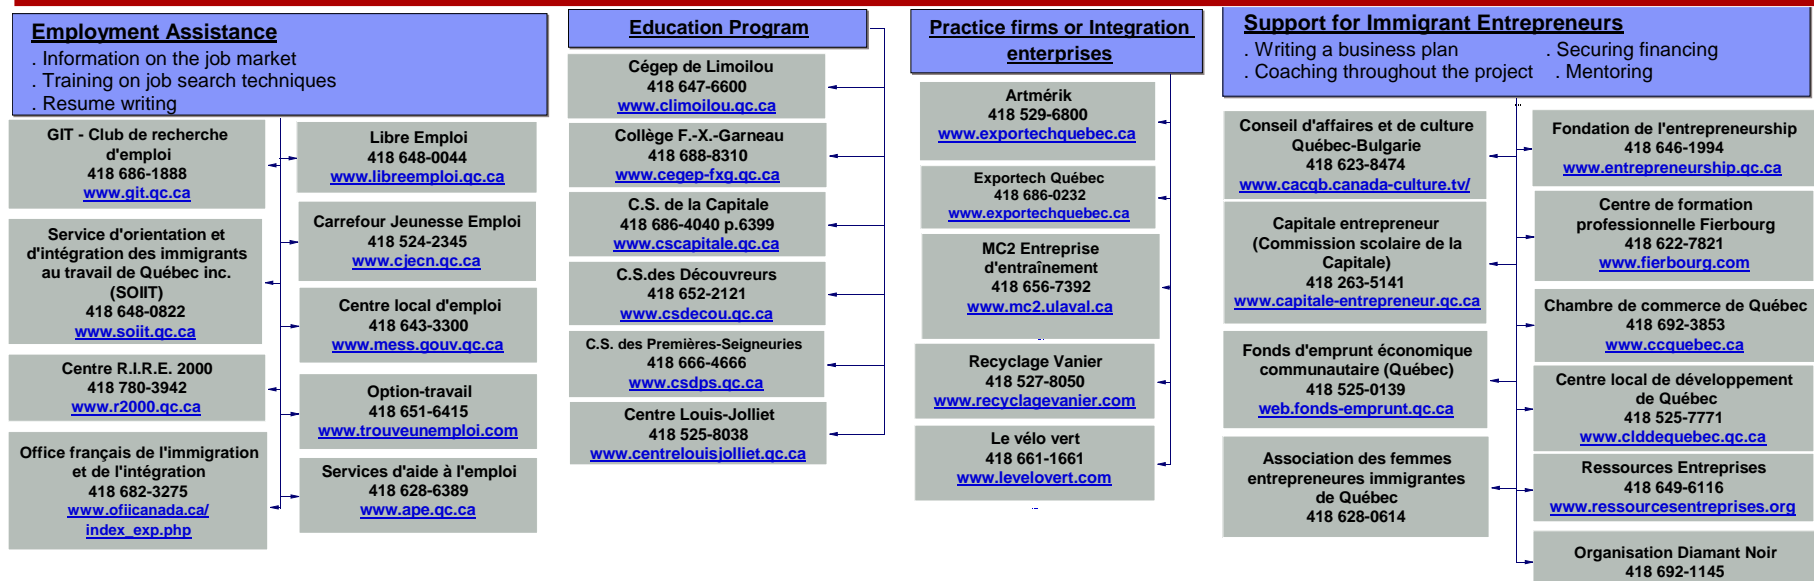

Other resources can help you become an active participant in the social, cultural, and economic life of the community, whether you're at work or enjoying leisure activities
